PROFESSIONAL SUMMARY

Infrastructure professional with 4 years of experience in IT support and corporate environments. Experience with N1/N2 support, Microsoft 365, IAM, root cause analysis, troubleshooting, networking, and security. Builds practical projects in cloud, automation, observability, and defensive security.

CORE SKILLS

Infrastructure and support: Microsoft 365, Windows, macOS, networking, remote support, ServiceNow, Netadmin, ticketing, and SLA.

Cloud and identity: Microsoft Azure, IAM, account administration, licensing, and access control.

Security and observability: Hardening, log analysis, SIEM, Wazuh, Zabbix, and Grafana.

Automation: PowerShell and Python for routines and technical demonstrations.

PROFESSIONAL EXPERIENCE

Infrastructure Services Analyst II
Jul 2025 - Present

DXC Technology

- Administer Microsoft 365 accounts and licenses, supporting access control in a corporate environment.
- Perform root cause analysis (RCA) and incident troubleshooting while tracking requests and backlog.
- Support infrastructure services, networking, Microsoft Azure, and endpoints, including macOS devices.

Support Analyst
Oct 2024 - Aug 2025

GMUD Serviços e Informática Ltda

- Diagnosed and resolved operating system, software, and hardware issues to maintain service continuity.
- Managed tickets, prioritization, escalation, and remote support aligned with SLAs.
- Documented processes and supported software testing and updates with technical teams.

Junior Support Technician
Aug 2022 - Oct 2024

Algar Tech

- Provided remote technical support and configured systems, software, and end-user equipment.
- Documented solutions, managed support tickets, and administered user accounts through Netadmin.

SELECTED PROJECTS

Cloud SOC Guardian: defensive demonstration with inventory, events, rules, findings, and reports. Zabbix + Grafana Monitoring: lab for metrics, alerts, and operational visualization.
